Expt-2:

Run a basic Word Count Map Reduce program to understand Map Reduce Paradigm.

AIM:

To run a basic Word Count MapReduce program using Hadoop.

PROCEDURE:

1. Create Data File:

```
nano word count data.txt
```

Example content for word_count_data.txt:

Hadoop is a framework that allows for distributed processing of large data sets.

2. Mapper Program (mapper.py):

```
import sys
for line in sys.stdin:
  line = line.strip()
  words = line.split()
  for word in words:
    print(f'{word}\t1')
```

3. Reducer Program (reducer.py):

```
import sys
current_word = None
current_count = 0
word = None

for line in sys.stdin:
    line = line.strip()
    word, count = line.split('\t', 1)

    try:
        count = int(count)
    except ValueError:
        continue
```

```
if current_word == word:
    current_count += count
else:
    if current_word:
        print(f'{current_word}\t{current_count}')
        current_count = count
        current_word == word

if current_word == word:
    print(f'{current_word}\t{current_count}')
```

4. **Set Hadoop Environment**:

```
hdfs dfs -mkdir /word_count_input
hdfs dfs -copyFromLocal word count data.txt /word count input
```

5. Run Word Count Program:

```
hadoop jar $HADOOP_HOME/share/hadoop/tools/lib/hadoop-streaming-*.jar \
-input /word_count_input/word_count_data.txt \
-output /word_count_output \
-mapper mapper.py \
-reducer reducer.py
```

6. Check Output:

hdfs dfs -cat /word count output/part-00000

OUTPUT:

```
rithika@Ubuntu:-$ hdfs dfs -cat /WordCount/Output/part-r-00000
2024-09-22 22:53:48,131 WARN util.NativeCodeLoader: Unable to load native-hadoop library for your platform... using builtin-java classes where applicable
Hi 1
am 1
are 2
fine 2
hi 1
how 1
you 1
```

RESULT:

Thus, the program for basic Word Count Map Reduce has been executed successfully.
